EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leslie Szivos on 25 June 2007.

The application has been amended as follows:

Cancel claims 9-20.

2. The following is an examiner's statement of reasons for allowance:

The claim combination wherein, in a tubular reactor and tubular heat exchanger cooler assembly, the upper end of said heat exchanger is coaxially and integrally affixed around an opening of the reactor lower outlet head, and wherein tubes within the heat exchanger do not penetrate into the reactor, is allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

3. The examiner acknowledges receipt of legible copy of FR 1,349,336, but the examiner notes that the information disclosure statement filed 13 April 2006 still fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is

presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the following document(s) referred to therein has/have not been considered as to the merits: FR 1,349,336.

Applicants comments regarding reference FR 1,394,336 being a counterpart of USP 3,146,075 are not clear, since said patents appear to have different inventors and to disclose different systems (see drawings in both patents).
